SCORE

### THE HANDGUN

The player's handgun has a limited amount of ammunition. Replenish ammunition by picking up the "BULLETS" item after defeating an enemy. If the player runs out of bullets and is not using another weapon, the player will only be able to use hand to hand combat. Keep an eye on the amount of bullets remaining.

### TIME REMAINING

Each "Episode" in the game is divided into a number of areas, which in turn are divided into stages. Each stage has a time limit for it to be cleared — failure to do so will result with the message "TIME OVER" being displayed. In this case the player will lose one credit.

### LIFE GAUGE/POISON GAUGE

When a player is attacked by an enemy the poison gauge will appear on the life gauge. If the poison gauge exceeds 50% of the life gauge, the player will become vulnerable to combo attacks. Over 80% will result in the reduction of the speed of the player's movement. Acquire the "ANTIDOTE" item to return the life gauge to normal.

### ITEMS

The player's character will automatically retrieve the "BULLETS" and "ANTIDOTE" items. Other items (weapons, etc.) can be retrieved by pressing either the hand to hand combat or shoot buttons. Extra weapons can be used until the displayed ammunition runs out. Break boxes that appear in the game to reveal items. Boxes contain both weapons and "LIFE UP" items, so smash them and retrieve the items.

### CONTINUE & GAME OVER

Once the player has lost all their lives or the "TIME OVER" message appears, the Continue Screen will be displayed. To continue press the Start Button before the time counter reaches zero. If the player has no remaining credits (5 credits is the default setting) the game is over!

## UNDEAD SOLDIER

### GOD

40 years before the current incident....

An organization funded by the government was created to conduct unofficial research and develop tactical weapons.

The name of this organization was GOD.

Scientists worked day and night on the development of what can be best described as "unknown weapons." The existence of such organizations is not rare, the defense of the nation is of high priority in any country.

However....

There was one crucial difference with this organization - it was not developing weapons but soldiers.

Its aim was to develop a recyclable soldier, one that could not be killed....

The scientists worked in a laboratory constructed 4000m below the earth. The only people allowed above ground were the Reconnaissance Team \*, all other staff were required to live out the rest of their lives underground.

Seeing as though the majority of staff were of the "mad scientist" variety they considered this as a blessing.

\*This was the group whose responsibility was to go above ground to carry out experiments.

They also brought back living specimens to be used for research. Large amounts of residents went missing in unexplained explosions or fires. This group were indeed on a mission from hell. Naturally all evidence of the deeds described above were destroyed by the organization.

## UDS (Undead Soldier)

A recyclable soldier, one that so long as it retained its physical form would attempt to complete its mission.

This aim however exceeded the sphere of human knowledge and it was 10 years before scientists would stumble upon the right line of research.

The first experimental model was completed one year later.

Its internal organs and part of its brain were created artificially and a large battery was attached to its back. Its appearance and form was hideous.

A vacant stare communicated a silent anger and sadness...

Through its artificial brain it was allowed to move only as much as needed to accomplish its task. The aim was to create a human tank, something that could take damage and keep fighting while its muscles and skeleton remained intact.

The machine depended on a large source of power to be operational and used a large quantity of parts. To mass produce it was necessary to find a different method.

The Gil cell...this was to have a large impact on the development of the U.D.S.

The cell was named after its discoverer, Dr. Gil Breitling. It had the ability to penetrate a person's body and kill them while preserving its vitality and dulling the sense of pain.

The cell had the ability to learn. Entering the brain it would fuse with the surrounding cells spread to the rest of the body with the urge to reproduce itself.

Its thoughts were very limited to the following instincts: "move," "eat" and "survive."

A simple form of life.....

However, the power to create a killing machine with the ability to infect others through a dose of the cell would be of great use as a military weapon.

Sending only one or two units could destroy an enemy location through continuing infection.

However with no ability to control the spread of infection, it was considered too dangerous to be of practical use.

Further experiments were carried out using animal genes. However, the problem remains unresolved to the present day.
